MYFAMILY END USER LICENSE AGREEMENT

IMPORTANT - READ CAREFULLY:

This End-User License Agreement is a legal agreement between you (either an individual or a single entity) and Corisoft Software for the software product identified above, which includes computer software and may include associated media, printed materials, and "online" or electronic documentation ("SOFTWARE PRODUCT").

By installing, copying, or otherwise using the SOFTWARE PRODUCT, you agree to be bound by the terms of this LICENSE AGREEMENT.

If you do not agree to the terms of this LICENSE AGREEMENT, do not install or use the SOFTWARE PRODUCT. Please do NOT order a registration key, if you do not agree to this license agreement.

License conditions

The SOFTWARE PRODUCT is protected by copyright laws and international copyright agreements, as well as other intellectual property laws and agreements. No part of the software or the manual may be multiplied, disseminated or processed in any way without the written consent of Corisoft Software. Violations of these conditions will be prosecuted in every case.

The use of the software is done at your own risk. The manufacturer and developer accepts no liability for any damages, either as direct or indirect consequence of the use or abuse of this product or software by the end-user. The SOFTWARE PRODUCT is being licensed and not sold.

All rights reserved. Software Copyright © 1997-2004 Corisoft Software.

SOFTWARE PRODUCT LICENSE

GRANT OF LICENSE. This LICENSE AGREEMENT grants you the following simple non-exclusive rights:

Applications Software

You may install and use one copy of the SOFTWARE PRODUCT, or any prior version for the same operating system, on a single computer.

The primary user of the computer on which the SOFTWARE PRODUCT is installed may make a second copy for his or her exclusive use.

Storage/Network Use

You may also store or install a copy of the SOFTWARE PRODUCT on a storage device, such as a network server, used only to install or run the SOFTWARE PRODUCT on your other computers over an internal network;

however, you must acquire and dedicate a license for each separate computer on which the SOFTWARE PRODUCT is installed or run from the storage device. A license for the SOFTWARE PRODUCT may not be shared or used concurrently on different computers.

OEM License

If you obtained this license agreement together with a hardware product, you are entitled to use this SOFTWARE PRODUCT as a part of the Hard and Software package according to this license agreement.

DESCRIPTION OF OTHER RIGHTS AND LIMITATIONS

SOFTWARE PRODUCT as Demo Version Even if the SOFTWARE PRODUCT is a demonstration version, it is protected by copyright laws and international copyright agreements, as well as other intellectual property laws and agreements.

Limitations on Reverse Engineering, Decompilation, and Disassembly

You may not reverse engineer, decompile, or disassemble the SOFTWARE PRODUCT, except and only to the extent that such activity is expressly permitted by applicable law notwithstanding this limitation. This also applies to Demo versions.

Separation of Components

The SOFTWARE PRODUCT is licensed as a single product. Its component parts may not be separated for use on more than one computer. This also applies to demo versions.

Rental

You may not rent, lease, or lend the SOFTWARE PRODUCT. This also applies to demo versions. Software Transfer You may not transfer the rights of this end-user LICENSE AGREEMENT.

Data Transmission

You may not transmit the SOFTWARE PRODUCT, or parts of it, without the prior permission of Corisoft Software.

Termination

The license to use the SOFTWARE PRODUCT ends at the 31st of December, 2050. Without prejudice to any other rights (civil or criminal), Corisoft Software may terminate this LICENSE AGREEMENT if you fail to comply with the terms and conditions of this LICENSE AGREEMENT. In such an event, you must destroy all copies of the SOFTWARE PRODUCT and all of its components.

Upgrades

If the SOFTWARE PRODUCT is labeled as an upgrade, you must be properly licensed to use the SOFTWARE PRODUCT identified by Corisoft Software as being eligible for the upgrade in order to use the SOFTWARE PRODUCT.

A SOFTWARE PRODUCT labeled as an upgrade replaces and/or supplements the product that forms the basis for your eligibility for the upgrade. You may use the resulting upgraded product only in accordance with the terms of this LICENSE AGREEMENT.

If the SOFTWARE PRODUCT is an upgrade of a component of a package of software programs that you licensed as a single product, the SOFTWARE PRODUCT may be used and transferred only as part of that single product package and may not be separated for use on more than one computer.

MyFamily

Introduction

MyFamily is an original application from Corisoft Software. MyFamily has been designed specifically for people who want to keep track of their family activities.

MyFamily will help you to know how life is organized around each family member and let you informed about important dates for all of them.

Don't be surprised or unready every day with your children, wife or husband. You will know everything about what somebody does and when he does it.

Unregistered software allows showing activities for one person only.

1. Persons

First you must enter each family member in the database. You can do this on the first pane view.

Press 'Options' and select "Add"

You can associate a smiley to the person according to its characteristics.

Let's go with this one.

Enter the name.

Now we added Kevin in our persons list.

As you can see, you get some information on the important dates for Kevin.

So now we don't have any appointment today and no one in a near future. Of course we don't add anyone until now.

2. Schedule

You want now know what Kevin is going to do today at school for example, or some personal activities like music or sport ? You never know at what time Kevin starts or at what time he stops.

This time has now finished. You will know everything on Kevin's activities !

Move to the right and open the next view.

We are Monday today, so first we have to enter all current activities for Monday.

We can proceed different ways : we can for example enter each period of time of school life, or just set School between 8:00am to 5:00pm

We can start with easy settings and just insert time school.

Press "Add"

A screenshot of a mobile application interface for a person named 'kevin'. At the top, there is a yellow smiley face icon and the name 'kevin'. Below this is a header bar with a left arrow, the word 'Monday', and a right arrow. The main area contains two sections: 'Start' with a text input field containing '08:00', and 'End' with a text input field containing '16:00'. To the right of the 'End' field is a small icon of a calendar and the number '123'. At the bottom, there are two buttons: 'Ok' and 'Cancel'.

Enter start and end time. These are 24 hours format.

A screenshot of the same mobile application interface. The 'Start' and 'End' fields are now hidden. The main area displays 'No data' in the center. Below it is a section titled 'What' with a text input field containing 'school'. To the right of the 'What' field is a small icon of a calendar and the text 'Abc'. At the bottom, there are two buttons: 'Ok' and 'Cancel'.

A screenshot of the mobile application interface showing a list of activities. The header bar is the same as the previous screens. Below the header, there is a list item with a blue background. The list item contains the text 'school' and '8:00 - 16:00'. Below the list item is a large empty white box. At the bottom, there are two buttons: 'Options' and 'Exit'.

Let's add now some other activities, just in case.

Now you know Kevin starts at 8:00am and finishes school at 4:00pm. He is learning guitar between 5:00pm and 6:30pm, so you must be at home at 7:00pm.

You can set this for other week days.

Press "Option" and select "Week" to choose a specific day.

Select Tuesday and we will give more details on this school day.

We can set this kind of information.

This depends on what you really need to know about its activities.

Every time you switch to the schedule view, MyFamily will open the current day.

3. Important dates

MyFamily should be uncomplete if we missed important dates. Have you forgotten some an important doctor appointment, or kevin's party ?

This is now impossible with MyFamily. Move to the right and open the next view.

Press "Options" and select "Add"

Select an icon for this record : for example this health icon.

The screenshot shows a handheld device screen with a yellow smiley face icon and the name 'kevin' at the top. Below is a purple header bar with a left arrow and the word 'Dates'. The main area has two input sections: 'Date' with a text box containing '07/12/2004', and 'Time' with a text box containing '16:00' and a blue '123' label to its right. At the bottom are 'Ok' and 'Cancel' buttons.

Set date and time

The screenshot shows the same handheld device screen. The 'Date' and 'Time' fields are now disabled. A new 'What' section has a text box containing 'doctor' and a blue 'Abc' label to its right. At the bottom are 'Ok' and 'Cancel' buttons.

The screenshot shows the handheld device screen with the appointment entry completed. The 'What' text box is now a list item with a red cross icon, the text 'doctor', and the date/time 'Tue 7 Dec 4:00 PM' below it. At the bottom are 'Options' and 'Exit' buttons.

Let's enter more appointments and important dates, just in case.

Past dates will be automatically removed by MyFamily, only future dates still remain in the database.

4. Check main view

Go back to the main view and be updated in real time !

No appointment today but the next one is in 2 days. So stay tuned !
